

PROActiv Projects

Need a new building energy management system (BEMS)? Or is it time to retrofit your existing one?

Perhaps you want to take your energy management capabilities to the next level by integrating our smart, analytical solutions?

PROActiv Projects encompasses everything we've been working on, everyday, since 1999. Reliable, versatile and all-encompassing, it'll cover your entire project, from start to finish.

Whatever your goal, you need a partner who'll:

- ✓ Take care of everything. On time and on budget.
- ✓ Guarantee a modern, energy efficient system.
- ✓ Provide quality service and ongoing support.
- ✓ Tailor solutions to your individual needs.

How does PROActiv Projects work?

PROActiv Projects is an umbrella term for all our tailored BEMS packages. It covers large and small projects across any industry type. And because our solutions are fully comprehensive (they cover every eventuality), they'll fulfil all your energy management needs, including:

- Installations (including offsite tested packages)
- Retrofits
- Commissioning
- Integration to third party systems
- Integration with other PROActiv Solutions (PROActiv Energy, Analytics and Health)
- Software engineering (written and tested off-site)
- In-house control panel design
- Client training

Why choose PROActiv Analytics

We don't subscribe to a 'one size fits all' approach - and neither should you. You're unique, after all, and so are your project requirements. With PROActiv Projects, expect personalised design, installation and support services, depending on what works best for you. You'll be supported by a local team, regardless of where you are in the UK. They'll get to know you, your site and requirements inside out and support you each step of the way. Rest assured, we're award-winning, fully accredited and great at what we do.

What'll PROActiv Projects do for you?

Improve energy efficiency

A new, modern and well-integrated BEMS will give you greater control and visibility over energy usage

Save money

By understanding precisely how and where you're using energy, you can home in on specific energy saving opportunities to slash those energy bills.

Keep your building operating efficiently

Keep your building assets, including your HVAC systems, in good working order with greater longevity.

Make your building 'smarter'

Don't fall behind in an increasingly digital era. Take advantage of the Internet of Things (IOT) to transform your building into an autonomous smart building.

Comfortable buildings = happy occupants

Increased comfort and fresh, clean air (if integrated with PROActiv Health) boosts productivity and engagement.

Personalise your service

Your team will be regarded as an extension of our own. We'll work closely with you, taking time to understand your specific wants and needs.

Get top results

Be safe in the knowledge that our engineers know their stuff. They're trained in a broader range of systems than most and are always brushing up on their skills.
